Company Overview: Footprints is a consultant and software development firm specializing in custom software solutions for Windows and Macintosh. By applying structured analysis and problem solving techniques with proven project management methods, Footprints has provided high powered, yet cost effective computer solutions to numbers of clients in education, engineering, business and medicine. The company has established itself as an industry leader in custom client-server software and powerful web solutions. Footprints' international client base is served from offices in Moab and Salt Lake City, Utah and in Clarion, PA.

Footprints custom software can be found in the medical profession (oncology, pharmacy, others), engineering (environmental, aeronautical, manufacturing), finance (bookkeeping, accounting, business management), education (school enrollment, class scheduling), non-profits and commercial software development as well as many other highly specialized fields. With a client base including many Fortune 500 companies as well as numerous smaller companies, a partial list of Footprints customers includes:

Boeing Commercial Airplane Group
Port of Los Angeles
Franklin Covey
Response Oncology
